Members of the 48th Legislature:

Senate Joint Resolution Number Eight of the 47th Legislature authorized an interim study of the uses of grants and contracts in the Department of Natural Resources; the Department of Fish, Wildlife, and Parks; the Coal Board within the Department of Commerce; and the Environmental Division of the Department of Health and Environmental Sciences. The attached report, which I respectfully submit to you, summarizes the use of grants and contracts in the agencies specified and includes a list of contractors and grantees for the 1981-83 interim as requested in the resolution.

Senator Ed B. Smith, Chairman  
Legislative Finance Committee

Senator Fred Van Valkenburg	Representative Jack K. Moore

## PREFACE

This report documents the findings of the Legislative Finance Committee in its study of the use of contracts and grants within the Department of Natural Resources; the Department of Fish, Wildlife, and Parks; the Coal Board; and the Department of Health and Environmental Sciences, Environmental Sciences Division. The study is the result of the legislative concern expressed through Senate Joint Resolution Eight of the Forty-Seventh Legislature.

The Legislative Finance Committee is a twelve-member, bipartisan, joint committee of the Senate and House of Representatives. It was created in 1975 as a permanent committee to oversee, study, and review financial matters of the state that are relevant to issues of policy and statewide importance. The committee appoints and employs the Legislative Fiscal Analyst who provides staff support for the committee. At least eight of the twelve members of the Legislative Finance Committee are selected from appropriation committees of the Legislature.

## INTRODUCTION

In the last regular session, the Legislature approved Senate Joint Resolution Eight (SJR 8), which directs the Legislative Finance Committee to study the use of grants and contracts within

The Department of Natural Resources (DNR)  
The Department of Fish, Wildlife and Parks (FWP)  
The Coal Board  
The Department of Health and Environmental Sciences,  
Environmental Sciences Division

Six areas of information were established by the Legislature in SJR 8. These included the following:

- 1) The source of funds for grants and contracted services
- 2) The statutory conditions attached to the use of those funds
- 3) The manner of distributing the funds
- 4) Method and degree of monitoring grants and contracts
- 5) Utilization of results
- 6) Alternative methods of accomplishing the same purpose.

Another provision included in SJR 8 requested that this study include a list of individuals and firms awarded grants during the 1981-82 interim. This list is included as Appendix 2. This list includes the contractor, amount of contract, duration of contract, source of funding, and purpose.

## METHODOLOGY

A majority of the information for this report was derived from a survey form sent to the agencies.

There were 1,240 contracts and grants reported by the four units being examined for the period July 1, 1980 through June 30, 1982. These contracts and grants included 405 by DNR, 315 by FWP, 460 by the Department of Health, and 60 by the Coal Board. Due to the large number of grants and contracts, it was not possible to review each individual grant/ contract. Therefore, this information is generalized about conditions within each agency.

## CONCERNS OF SJR 8

There were six areas of review established within SJR 8 as listed in the introduction. Each will be discussed within this section of the report.

### Sources and Conditions of Funding

Funding for these grants and contracts came from general funds, earmarked funds, federal and private funds, and revolving funds. The funding amounts and sources are shown for the various contracts and grants in Table 1.

---

Table 1  
Funding Sources and Amounts  
For Contracts and Grants  
July 1, 1980 - June 30, 1982

---

	<u>General Fund</u>	<u>Earmarked</u>	<u>Fed./Priv.</u>	<u>Revolving</u>	<u>Total</u>
FWP	\$ 11,443	\$ 604,822	\$1,766,898	\$2,886	\$ 2,386,049
DNR	48,674	7,054,711	1,402,529	---	8,505,914
Environ. Sciences (Health)	358,995	1,811,270	1,155,299	---	3,325,564
Coal Board	-0-	13,221,316	---	---	13,221,316
<b>Total</b>	<b>\$419,112</b>	<b>\$22,692,119</b>	<b>\$4,324,726</b>	<b>\$2,886</b>	<b>\$27,438,843</b>

---

As is shown in Table 1, \$27,438,843 was spent for contracts and grants in fiscal 1981 and 1982. The agencies reported that these expenditures were made with \$419,112 from general funds, \$22,692,119 from earmarked funds, \$4,324,726 from federal and private funds, and \$2,886 from revolving funds.

In most cases, the funding source of a given contract or grant depends upon the contracting unit's overall funding sources. For example, contracts from the air and water quality bureaus in the Department of Health are funded partially from federal funds and the remainder comes from the general fund, because a general fund match is required by the Environmental Protection Agency (EPA) to receive the federal funds. This required match is represented in every contract that is made.

The Department of Natural Resources (DNR) and the Department of Fish, Wildlife and Parks (DFWP) reported very little general fund being used for contracted services or grants. This is attributable to the fact that in DNR, a majority of the contracts and grants were made for projects supported with earmarked or federal funds--water resources, energy, and facility siting. The Department of Fish, Wildlife and Parks receives general fund only in its Parks Division and therefore, it was the only division reporting the use of general fund.

The Coal Board is funded entirely from earmarked revenue derived from the coal severance tax. Therefore, all grants and contracts made by the board are funded with earmarked revenue.

#### Statutory Conditions

The statutory conditions attached to the use of the various funding sources primarily involve the use of earmarked revenues. The specific state statutes relating to each earmarked fund involved are included as

Appendix 1. There are many earmarked accounts used by the agencies studied and the major earmarked revenues are summarized below.

The Coal Board is directed in statute to use its Coal Tax funding to assist units of government impacted from coal development.

The majority of the grants awarded by the Energy Division within the Department of Natural Resources also are funded by the coal tax. The use is directed by statute to financial assistance for development of alternative energy sources which utilize renewable resources. The Facility Siting Division within DNR is required to spend its earmarked revenues to cover the costs of evaluating an application for a proposed utility and the subsequent preparation of an environmental impact statement (EIS). The statute specifically states that the fee assessed against a utility company can only be used by the department to compile the necessary information and fulfilling its obligations as outlined in the Facility Siting Act.

The Water Resource Division expends general fund and three types of earmarked revenues: resource indemnity trust funds (RITF), renewable resource development funds (RRD), and water rights filings. The use of RITF funds is designated in statute for projects which improve the environment. Renewable Resources funds are designated in statute to be used for projects which develop renewable sources of energy. The expenditure of RRD earmarked funds are approved by the Legislature.

Approximately 41 percent of the funding for the Department of Fish, Wildlife and Parks is from some type of earmarked funding. Each earmarked fund is described in statute and the purposes for which the funds can be used are also designated. In a similar manner, the environmental areas in the Department of Health also spend earmarked funds from the subdivision review fees, air quality variance review, and the junk vehicle

program. The purposes that these earmarked funds may be used for are designated in the statutes.

#### Distribution of Funds

The review of distribution of funds is addressed in terms of contracts and grants. A breakdown of grant and contract expenditures by department is displayed below in Table 2.

---

Table 2  
Grant and Contract Expenditures  
FY 1981 and FY 1982

---

<u>Department</u>	<u>Contracts</u>	<u>Grants</u>	<u>Total</u>
DFWP	\$ 741,305	\$ 1,644,744	\$ 2,386,049
DNR	3,282,459	5,223,455	8,505,914
DHES	378,135	2,947,429	3,325,564
Coal	<u>65,352</u>	<u>13,155,964</u>	<u>13,221,316</u>
Total	\$4,467,251	\$22,971,592	\$27,438,843
	=====	=====	=====

---

As shown in Table 2, \$4,467,251 was expended for contracts and \$22,971,592 was granted by the agencies studied under SJR 8. Major grant categories include alternative energy projects and renewable resource projects within DNR, land and water conservation projects within FWP, local impact grants from the Coal Board, and within the health department junk vehicle programs, water quality projects, and general payments to counties for assistance in enforcing state health laws. The reported uses of contracts varied widely and was often for specialized information.

#### Contracts

Last session, a new chapter, Section 18-8-101 through 18-8-112, MCA, was added to the Montana Codes that deals specifically with the use

of consultants by state agencies. Within this chapter, it is required that each agency establish a bid list. Consultants who are interested in work for a particular agency may request to have their name put on this list. When the agency anticipates a contract for consulting services will exceed \$5,000, all the parties on the bid list are to be solicited for bids.

However, Section 18-8-103, MCA, specifically excludes any contracts with

"1) ...registered professional engineers, surveyors, real estate appraisers, or registered architects concerned with the study, design, or construction of state facilities or highways;

2) physicians, dentists, or other medical, dental, or health care providers; and

3) expert witnesses hired for use in litigation, hearings officers hired in rulemaking and contested case proceedings under the Montana Administrative Procedure Act, or attorneys as specified by executive order of the Governor."

A review of the contracts showed many consultants in the first and third categories (described above) receiving contracts. As these types of contracts are not required to be put to bid, it was often found (especially regarding water projects) that one contractor would receive several different contracts based on an agency's prior experience with that contractor.

A large number of contracts were reported for legal assistance. Most agencies have in-house legal assistance. However, when there is no in-house legal staff or the in-house staff is unable to handle the workload, the agency has two options for obtaining legal counsel. First the agency can contract with the Attorney General's Legal Services Program. If the Attorney General's office is unable to provide assistance due to workload or technical knowledge, an agency may then present its request to the Legal Services Review Committee for outside legal counsel as required by Executive Order 4-81-3. This committee is made up of the budget director,

the Attorney General, and the Governor's chief legal counsel. According to the order, private legal contracts are to be approved only if one or more of the following criteria are met:

- "a) The agency's legal staff lacks time or essential expertise to handle the matter.
- b) A substantial conflict of interest exists affecting all of the agency's legal staff or all but a number insufficient to handle the matter.
- c) A temporary need for extensive legal work exists in a geographic area remote from the agency's home office.
- d) An unusual and/or temporary increase exists in the agency's legal services workload.
- e) Any other circumstances which the agency believes necessitates the use of private legal counsel."

The departments reported the contracts for legal assistance were in accordance with Executive Order 4-81-3. Generally when legal counsel was contracted for, it involved highly technical legal matters or a potential conflict of interest was involved with a decision-making unit. For example, when the health department's internal legal staff was unable to handle the workload, the additional work was contracted out to the Attorney General's office on a fee for service basis.

Many small, miscellaneous contracts were also reported. In some cases, contracts were put to bid; for example, cleaning services in field offices. In other cases, few people were qualified or available due to the remote area of the work, and people known to be interested were offered the contract. An example of this type of contract is monitoring air quality measuring stations located at various locations around the state.

#### Grants

The grants reported from the designated agencies can generally be divided into two categories: 1) grants made to applicants who submitted a grant in response to a request for a proposal (RFP) issued from the

agency; and 2) grants made to local governmental units for services conducted at the local level to insure compliance with state laws.

Within the first category, grants to an applicant who submits an acceptable proposal, it was found that two divisions in the Department of Natural Resources award these types of grants--Water Resources and the Energy Division.

The grants awarded by the Water Resources Division involve the expenditure of renewable resource development funds for water projects. The department solicits and receives project proposals prior to each session. The Legislature reviews the priorities and funds the projects that are deemed worthwhile. The Energy Division actually distributes a request for proposal (RFP), describing what type of project they desire to build. The division then chooses among the proposals submitted. In this way, projects seen as necessary or desirable can be encouraged, and projects that would duplicate earlier projects can be eliminated.

The primary purpose of the Coal Board is to review applications and award grants to localities impacted by coal development. The Coal Board reviews applications as they are submitted and funds those requests they deem acceptable.

The other general type of grant is one to local government units as reimbursement for or assistance to help check for compliance with state laws. Examples of this grant type are the junk car program from the Solid Waste Division of the health department; air quality grants from the Air Quality Division; and grants made to counties for inspection services made by local county sanitarians. Although these services performed by the local government units may actually be a contractual agreement between the unit and the state, these agreements must be classified as grants

according to the SBAS definition. (Any funds passed through to another unit of government are considered grants.)

#### Method and Degree of Monitoring

The type of reporting required of the contractor or grantee varied and was usually dependent upon the form of the final product. In cases where a written report was the product of the contract, it was reported that some contracts were "monitored" only by the review of the final report. It was also reported that some contracts were monitored by frequent meetings with the contractor regarding the status of the report.

The Energy Division of the Department of Natural Resources has recently revised its method of monitoring the alternative energy grants so that it is insured that the agency receives an acceptable product prior to payment in full. This was achieved by requiring that the project be completed in phases, with the product described at the end of each phase in the grant.

As each phase is completed, the department makes an on-site inspection of the project to insure it is in accordance with the conditions stated in the grant. When the project is approved at the end of any given phase, partial payments are made to the grantee only after receipts for expenditures are presented to the department. In this manner, an acceptable product is monitored through various phases and proof of expenditure is available.

#### Utilization and Results

The survey forms returned indicated that in most cases contracts were awarded to obtain specialized information beyond the scope of the departments' abilities. It was indicated by the departments that this

information was usually incorporated into departmental reports being prepared, some for public release and others for in-house use, such as air quality data for the Department of Health. In the case of grants, usually a specific service or information was provided to the department.

Last session, legislation was passed to address the issue of what is done with the results of contracts with consultants. In Section 18-8-111, MCA, it is stated that a brief resume of the results of a consultant's contract be provided to OBPP or the Legislative Fiscal Analyst upon request. In addition, Section 18-8-112, MCA, further requires that the agency, upon request, to describe what action was taken regarding any recommendations received from a consultant. This legislation allows an avenue for legislators to examine whether or not to fund a future contract.

#### Alternative Methods of Achieving Results

Almost universally, agencies stated only two options were available, other than contracting. These were hiring an FTE, or not obtaining the service provided by the contract at all.

## SUMMARY

In summary the information gathered for SJR 8 showed the following general trends.

1. A majority of grants and contracts were funded with earmarked funds derived from various sources. The next largest funding source was federal funds. Very few contacts and grants were funded solely with general fund. However, general fund was used on occasion to meet matching requirements of federal law.

2. It appears that generally the laws were followed regarding the use of grants and contracts.

3. From the information provided, it appears the laws regarding statutory uses of funds and the distribution of funds were adhered to by the reporting agencies. However, the current statutes exempt a large number of professions from the competitive bid processs.

4. Very little monitoring of contract work was reported other than a review of the final product or report.

5. It was reported that the majority of information derived from contracts was utilized in agency reports. Many agencies reported that the in-house staff did not have the technical capabilities to develop the needed information; and therefore, the work was contracted out.

6. In almost all cases, the alternative methods offered for accomplishing the same purpose included two options--A) hire additional FTE, and B) do the project without the information being developed or assistance being given.

Appendix 1  
State Statutes Addressing Use of Earmarked Funds  
for Units Examined Under SJR 8

Coal Board

~~90-6-205. Coal Board -- general powers.~~ The board may:

- (1) retain professional consultants and advisors;
- (2) adopt rules governing its proceedings;
- (3) consider applications for grants from the local impact and education trust fund account; and

(4) award grants, subject to 90-6-207, not to exceed in any one year seven-elevenths and after June 30, 1979, seven-fifteenths of the revenue paid into the local impact and education trust fund account, to local governmental units and state agencies to assist local governmental units in meeting the local impact of coal development by enabling them to adequately provide governmental services and facilities which are needed as a direct consequence of coal development. As used in the preceding sentence, "revenue paid" does not include interest income from the account reinvested in the account in trust for the public schools and the university system.

History: En. 50-1706 by Sec. 7, Ch. 502, L. 1975; amd. Sec. 3, Ch. 540, L. 1977; R.C.M. 1947, 50-1806(part).

~~90-6-206. Basis for awarding grants.~~ (1) Such grants shall be awarded on the basis of:

- (a) need;
- (b) degree of severity of impact from the coal development;
- (c) availability of funds; and
- (d) degree of local effort in meeting these needs.

(2) In determining the degree of local effort, the board shall review the millage rates levied for the present fiscal year in relation to the average millage rates levied during the 3 years immediately preceding coal development in that area or 1970, whichever is later, which impacts the local government unit applying for assistance.

(3) Millage rates for the present fiscal year which are lower than the average millage rate levied during the 3 years immediately preceding coal development in that area or 1970, whichever is later, shall be deemed by the board to indicate the lack of local effort. The application under such circumstances may be rejected.

(4) Further, in determining the degree of local effort, the board shall consider the possibility of requiring that local government unit to increase its bonded indebtedness to provide all or part of the governmental service or facility which is needed as a direct consequence of coal development.

(5) To the extent funds are needed to evaluate and plan for the impact needs caused by coal development, consideration of bond issues and millage levies may be waived.

(6) To the extent the applicant has no history of mill levies, subsections (2) and (3) do not apply.

History: En. 50-1706 by Sec. 7, Ch. 502, L. 1975; amd.

Sec. 3, Ch. 540, L. 1977; R.C.M. 1947, 50-1806(part); amd.  
Sec. 1, Ch. 619, L. 1979.

90-6-207. Priorities for impact grants. (1) The department of commerce shall designate counties, towns, school districts, and other governmental units which have had or expect to have an increase in estimated population of at least 10% during any 3 years since 1972 as a result of the impact of coal development. The coal board shall, subject to the appropriations of the legislature, award at least 50% of all grants awarded to governmental units and state agencies for meeting the needs caused by coal development each year to these designated governmental units.

(2) Attention should be given by the coal board to the need for community planning before the full impact is realized. Applicants should be able to show how their request reasonably fits into an overall plan for the orderly management of the existing or contemplated growth problems.

(3) All funds placed in the local impact and educational trust fund account established under this part, subject to the limitations imposed by 90-6-211, shall be subject to appropriations by the legislature for use related to local impact or for transfer to a permanent trust for education.

History: En. 50-1707 by Sec. 8, Ch. 502, L. 1975;  
R.C.M. 1947, 50-1807; amd. Sec. 6, Ch. 274, L. 1981.

90-6-208. Applications for grants. The governing body of a city, town, county, or school district or any other local or state governmental unit or agency may apply for a grant to enable it to provide governmental services which are needed as a direct consequence of coal development. The coal board shall prescribe the form for applications. Applicants shall describe the nature of their proposed expenditures and the time involved.

History: En. 50-1709 by Sec. 10, Ch. 502, L. 1975;  
R.C.M. 1947, 50-1809(part).

90-6-209. Limitations on grants. The board may commit itself to the expenditure of funds for more than 1 year for a single project, as long as the grant does not extend over more than 10 years and does not exceed reasonable revenue expectations. No state agency may receive grants which exceed 5% of the money allocated to the board.

History: En. 50-1709 by Sec. 10, Ch. 502, L. 1975;  
R.C.M. 1947, 50-1809(part).

Department of Fish, Wildlife, and Parks

87-1-201. Powers and duties. (1) The department shall supervise all the wildlife, fish, game, game and nongame birds, waterfowl, and the game and fur-bearing animals of the state. It possesses all powers necessary to fulfill the

duties prescribed by law and to bring actions in the proper courts of this state for the enforcement of the fish and game laws and the rules adopted by the department.

(2) It shall enforce all the laws of the state respecting the protection, preservation, and propagation of fish, game, fur-bearing animals, and game and nongame birds within the state.

(3) It shall have the exclusive power to spend for the protection, preservation, and propagation of fish, game, fur-bearing animals, and game and nongame birds all state funds collected or acquired for that purpose, whether arising from state appropriation, licenses, fines, gifts, or otherwise. Money collected or received from the sale of hunting and fishing licenses or permits, from the sale of seized game or hides, from fines or damages collected for violations of the fish and game laws, or from appropriations or received by the department from any other sources are appropriated to and under control of the department.

(4) It may discharge any appointee or employee of the department for cause at any time.

(5) It may dispose of all property owned by the state used for the protection, preservation, and propagation of fish, game, fur-bearing animals, and game and nongame birds which is of no further value or use to the state and shall turn over the proceeds from the sale to the state treasurer to be credited to the fish and game account in the earmarked revenue fund.

(6) It may not issue permits to carry firearms within this state to anyone except regularly appointed officers or wardens.

(7) The department is hereby authorized to make, promulgate, and enforce such reasonable rules and regulations not inconsistent with the provisions of chapter 2 as in its judgment will accomplish the purpose of chapter 2.

(8) The department is authorized to promulgate rules relative to tagging, possession, or transportation of bear within or without the state.

History: Ap. p. Sec. 4, Ch. 193, L. 1921; re-en. Sec. 3653, R.C.M. 1921; amd. Sec. 2, Ch. 77, L. 1923; amd. Sec. 2, Ch. 192, L. 1925; amd. Sec. 1, Ch. 200, L. 1935; re-en. Sec. 3653, R.C.M. 1935; amd. Sec. 1, Ch. 157, L. 1941; amd. Sec. 1, Ch. 40, L. 1951; amd. Sec. 1, Ch. 157, L. 1955; amd. Sec. 1, Ch. 151, L. 1957; amd. Sec. 1, Ch. 36, L. 1959; amd. Sec. 1, Ch. 96, L. 1959; amd. Sec. 1, Ch. 173, L. 1965; amd. Sec. 1, Ch. 344, L. 1969; amd. Sec. 1, Ch. 279, L. 1971; amd. Sec. 1, Ch. 364, L. 1973; amd. Sec. 3, Ch. 511, L. 1973; amd. Sec. 13, Ch. 417, L. 1977; Sec. 26-104, R.C.M. 1947; Ap. p. Sec. 4, Ch. 267, L. 1955; amd. Sec. 13, Ch. 417, L. 1977; Sec. 26-202.4, R.C.M. 1947; Ap. p. Sec. 1, Ch. 239, L. 1965; amd. Sec. 2, Ch. 319, L. 1967; amd. Sec. 4, Ch. 9, L. 1977; amd. Sec. 13, Ch. 417, L. 1977; Sec. 26-202.5, R.C.M. 1947; R.C.M. 1947, 26-104, 26-202.4, 26-202.5(2); amd. Sec. 2, Ch. 44, L. 1979.

87-1-601a\_\_Use\_of\_fish\_and\_game\_money (1) All money collected or received from the sale of hunting and fishing licenses or permits, from the sale of seized game or hides, or from damages collected for violations of the fish and

game laws of this state, from appropriations, or received by the department from any other state source shall be turned over to the state treasurer and placed by him in the earmarked revenue fund to the credit of the department. Any money received from federal sources shall be deposited in the federal and private revenue fund to the credit of the department.

(2) That money shall be exclusively set apart and made available for the payment of all salaries, per diem, fees, expenses, and expenditures authorized to be made by the department under the terms of this title. That money shall be spent for those purposes by the department, subject to appropriation by the legislature.

(3) Any reference to the fish and game fund in this code means fish and game money in the earmarked revenue fund and federal and private revenue fund.

(4) All money collected or received from fines and forfeited bonds relating to violations of state fish and game laws under Title 87 shall be deposited by the state treasurer and credited to the department of fish, wildlife, and parks in an earmarked revenue fund account for this purpose. Out of any fine imposed by a court for the violation of the fish and game laws, the costs of prosecution shall be paid to the county where the trial was held in any case where the fine is not imposed in addition to the costs of prosecution.

(5) Money received by the department from the sale of surplus real property; exploration or development of oil, gas, or mineral deposits from lands acquired by the department except royalties or other compensation based on production; and from leases of interests in department real property not contemplated at the time of acquisition shall be deposited in an account within the trust and legacy fund of the state treasury. The interest derived therefrom, but not the principal, may be used only for the purpose of operation, development, and maintenance of real property of the department, and only upon aporopriation by the legislature. If the use of money as set forth herein would result in violation of applicable federal laws or state statutes specifically naming the department or money received by the department, then the use of this money must be limited in the manner, method, and amount to those uses that do not result in such violation.

History: En. Sec. 21, Ch. 193, L. 1921; re-en. Sec. 3670, R.C.M. 1921; amd. Sec. 32, Ch. 59, L. 1927; amd. Sec. 1, Ch. 53, L. 1933; amd. Sec. 2, Ch. 114, L. 1945; amd. Sec. 159, Ch. 147, L. 1963; amd. Sec. 17, Ch. 511, L. 1973; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 26-121; amd. Sec. 2, Ch. 640, L. 1979; amd. Sec. 1, Ch. 388, L. 1981.

~~87-1-605. Fees used to purchase recreational facilities~~ (1) One dollar of the fee for Class A resident fishing license, \$1 of the fee for Class B-4 nonresident 1-day fishing license, \$5 of the fee for the Class B-3 nonresident 6-day fishing license, and \$5 of the fee for the Class B nonresident fishing license shall be used for the purchase, operation, development, and maintenance of fishing accesses; stream, river, and lake frontages; and the land deemed necessary to provide recreational use thereof.

(2) The amount of funds used for operation, development, and maintenance may not exceed 25% of the moneys set aside each year under this section. The funds raised under this section may not be used in lieu of any funds or sources of funds currently being used for acquisition or purchase of fishing accesses, stream, river, or lake frontages and the land deemed necessary to provide recreational use thereof but serve in addition to those funds. The moneys used for operation, development, and maintenance may be used only for these purposes on lands acquired with funds under this section after April 30, 1974.

History: En. Sec. 3, Ch. 408, L. 1973; amd. Sec. 1, Ch. 82, L. 1977; R.C.M. 1947, 26-234; amd. Sec. 1, Ch. 461, L. 1981.

87-1-710a. Use of hunters' license fees for department purposes only. In accordance with the other requirement of said act of congress, it shall be the law of this state, so long as this assent shall be unrepealed, that no license fees paid by hunters in the state of Montana shall be used or taken for any other purpose than the administration and use of the department.

History: En. Sec. 4, Ch. 167, L. 1941; R.C.M. 1947, 26-1125.

87-4-602a. Seining licenses. The director shall keep a record of all licenses issued by him for the use of a net for the taking of fish, showing the name of the applicant, the date of issue, the waters to be used in, and the date of revocation if the license is revoked. The director shall pay all fees received for those licenses into the state treasury to the credit of the fish and game moneys in the earmarked revenue fund. A license may not be issued to a person whose license has been revoked for cause.

History: En. Sec. 23, Ch. 173, L. 1917; re-en. Sec. 3715, R.C.M. 1921; re-en. Sec. 3715, R.C.M. 1935; amd. Sec. 30, Ch. 511, L. 1973; R.C.M. 1947, 26-333.

87-4-808a. Fines, bonds, penalties and fees. Fines, bonds, or penalties shall be administered and disposed of in accordance with the provisions of 87-1-601. Fees obtained under this part shall be deposited with the state treasurer and credited to the earmarked revenue fund, fish and game account.

History: En. Sec. 8, Ch. 130, L. 1969; amd. Sec. 46, Ch. 511, L. 1973; R.C.M. 1947, 26-1212.

23-2-619a. Dealer registration certificate -- use of fees. (1) A dealer registration certificate shall be issued in accordance with this part.

(2) The dealer application shall be accompanied by an application fee of \$5 and a registration fee of \$5. Upon receipt of the dealer application and payment of fees, the dealer shall be issued two dealer snowmobile identification cards which shall be carried by the dealer or the dealer's customer when demonstrating the dealer's snowmobiles.

(3) No bond is required of the dealer.

(4) The dealer shall have a principal place of business where he shall maintain all his business records and display and sell merchandise.

(5) An applicant for renewal of a snowmobile dealer registration shall certify that he has sold 3 or more snowmobiles during the preceding year or pay an additional \$50 renewal registration fee or provide a copy of a written new snowmobile franchise or sales agreement that the applicant has with a manufacturer, importer, or distributor.

(6) Additional dealer snowmobile identification cards as required by need justified to the division of motor vehicles may be purchased by the dealer for a fee of \$2.

(7) Dealer registration certificates and identification cards expire on June 30 following the date of issuance.

(8) (a) The dealer application fees and all interest accruing from use of this money shall be deposited in the earmarked revenue fund to the credit of the department, with one-half designated for use in enforcing the purposes of this part and one-half designated for use in the development, maintenance, and operation of snowmobile facilities.

(b) All money collected from dealer registration and renewal registration fees shall be deposited in the motor vehicle recording account of the earmarked revenue fund.

History: En. Sec. 3, Ch. 494, L. 1973; amd. Sec. 21, Ch. 421, L. 1977; R.C.M. 1947, 53-1029; amd. Sec. 7, Ch. 363, L. 1979.

23-2-644a. Use of funds from fines and forfeitures. All fines and forfeitures collected under this part relating to snowmobiles shall be transmitted to the state treasurer who shall deposit such fines and forfeitures in the earmarked revenue fund to the credit of the department to be used only for snowmobile safety and education.

History: En. Sec. 4, Ch. 435, L. 1971; amd. Sec. 19, Ch. 421, L. 1977; R.C.M. 1947, 53-1027(2).

23-2-507a. Penalties. Violations of any section of this part unless otherwise specified shall be a misdemeanor and be punishable by fine of not less than \$15 or more than \$500 or by imprisonment up to 6 months or by both such fine and imprisonment. All fine and bond forfeitures shall be transmitted to the state treasurer who shall deposit such fines and forfeitures in the motorboat account of an earmarked fund. The moneys shall be used only by the department for enforcement of this part, as amended.

History: En. Sec. 18, Ch. 285, L. 1959; amd. Sec. 15, Ch. 514, L. 1973; amd. Sec. 18, Ch. 124, L. 1977; amd. Sec. 13, Ch. 417, L. 1977; R.C.M. 1947, 69-3518.

23-2-512a. Identification numbers. (1) The owner of each motorboat requiring numbering by this state shall file an application for number in the office of the county treasurer where the motorboat is owned or taxable on forms prepared and furnished by the division of motor vehicles. The

application must be signed by the owner of the motorboat and be accompanied by a fee of \$1. Any alteration, change, or false statement contained in the application will render the certificate of number void. Upon receipt of the application in approved form, the county treasurer shall issue to the applicant a certificate of number prepared and furnished by the division of motor vehicles, stating the number assigned to the motorboat and the name and address of the owner.

(2) Before filing the application with the county treasurer, the applicant shall submit it to the county assessor, who shall enter on the application, in a space to be provided for that purpose, the market value and taxable value of the motorboat for the year for which the application for registration is made.

(3) The applicant, upon the filing of the application, shall pay to the county treasurer the registration fee and the personal property taxes assessed against the motorboat or vessel for the current year of registration before the application for registration or reregistration may be accepted by the county treasurer.

(4) Should the ownership of a motorboat change, a new application form with fee must be filed within a reasonable time with the county treasurer and a new certificate of number assigned in the same manner as provided for in an original assignment of number.

(5) If an agency of the United States government has in force a comprehensive system of identification numbering for motorboats in the United States, the numbering system employed pursuant to this part by the division of motor vehicles must be in conformity.

(6) Every certificate of number and the license decals assigned under this part continues in effect for a period not to exceed 1 year unless terminated or discontinued in accordance with the provisions of this part. Certificates of number and license decals must show the date of expiration and may be renewed by the owner in the same manner provided for in the initial securing of the certificate.

(7) Certificates of number expire on April 30 of each year and may not be in effect unless renewed under this part.

(8) In event of transfer of ownership, the purchaser shall furnish the county treasurer notice within a reasonable time of the acquisition of all or any part of his interest, other than the creation of a security interest, in a motorboat numbered in this state or of the loss, theft, destruction, or abandonment of the motorboat. The transfer, loss, theft, destruction, or abandonment terminates the certificate of number for the motorboat. Recovery from theft or transfer of a part interest that does not affect the owner's right to operate the motorboat does not terminate the certificate of number.

(9) A holder of a certificate of number shall notify the county treasurer within reasonable time if his address no longer conforms to the address appearing on the certificate and furnish the county treasurer with his new address. The division of motor vehicles may provide by rule for the surrender of the certificate bearing the former address and its replacement with a certificate bearing the new address or the alteration of an outstanding certificate to show the new address of the holder.

(10) (a) The number assigned must be painted on or attached to each outboard side of the forward half of the motorboat or, if there are no such sides, at a corresponding location on both outboard sides of the foredeck of the motorboat. The number assigned must read from left to right in Arabic numerals and block characters of good proportion at least 3 inches tall excluding border or trim of a color that contrasts with the color of the background and be so maintained as to be clearly visible and legible. The number may not be placed on the obscured underside of the flared bow where it cannot be easily seen from another vessel or ashore. No numerals, letters, or devices other than those used in connection with the identifying number issued may be placed in the proximity of the identifying number. No numerals, letters, or devices that might interfere with the ready identification of the motorboat by its identifying number may be carried as to interfere with the motorboat's identification. No number other than the number and license decal assigned to a motorboat or granted reciprocity under this part may be painted, attached, or otherwise displayed on either side of the forward half of the motorboat.

(b) The certificate of number shall be pocket size and available to federal, state, or local law enforcement officers at all reasonable times for inspection on the motorboat whenever the motorboat is on waters of this state.

(c) Boat liveries are not required to have the certificate of number on board each motorboat, but a rental agreement must be carried on board livery motorboats in place of the certificate of number.

(11) Fees collected under this section shall be transmitted to the state treasurer who shall deposit the fees in the motorboat certificate identification account of an earmarked revenue fund. These fees shall be used only for the administration and enforcement of this part, as amended.

(12) An owner of a motorboat must within a reasonable time notify the division of motor vehicles, giving the motorboat's identifying number and the owner's name when that motorboat becomes documented as a vessel of the United States or is transferred, lost, destroyed, abandoned, or frauded or within 60 days after change of state of principal use.

History: En. Sec. 4, Ch. 285, L. 1959; amd. Sec. 1, Ch. 219, L. 1961; amd. Sec. 1, Ch. 336, L. 1969; amd. Sec. 2, Ch. 348, L. 1969; amd. Sec. 45, Ch. 391, L. 1973; amd. Sec. 51, Ch. 511, L. 1973; amd. Sec. 3, Ch. 514, L. 1973; amd. Sec. 1, Ch. 52, L. 1974; amd. Sec. 7, Ch. 124, L. 1977; amd. Sec. 45, Ch. 566, L. 1977; R.C.M. 1947, 69-3504(1), (2), (3), (6) thru (14); amd. Sec. 2, Ch. 136, L. 1979.

Department of Natural Resources and Conservation

82-11-135a Money earmarked for board expenses. All money collected under this chapter shall be deposited in the earmarked revenue fund by the state treasurer and shall be used for the purpose of paying all expenses of the board and for no other purpose. All these moneys shall be used by the

board subject to the approval of the department of administration and biennial appropriations by the legislature. Income and interest from investment of the board's moneys in the earmarked revenue fund shall be credited to the board.

History: En. Sec. 22, Ch. 238, L. 1953; amd. Sec. 1, Ch. 234, L. 1955; amd. Sec. 1, Ch. 198, L. 1957; amd. Sec. 1, Ch. 47, L. 1961; amd. Sec. 160, Ch. 147, L. 1963; amd. Sec. 1, Ch. 315, L. 1973; amd. Sec. 1, Ch. 130, L. 1974; amd. Sec. 81, Ch. 253, L. 1974; amd. Sec. 1, Ch. 413, L. 1975; amd. Sec. 1, Ch. 178, L. 1977; amd. Sec. 1, Ch. 254, L. 1977; R.C.M. 1947, 60-145(7).

85-1-331a. Acceptance and use of appropriations and contributions. The department may receive and accept appropriations and contributions from any source of either money or property or other things of value to be held, used, and applied for the purposes in this chapter.

History: En. Sec. 16, Ch. 35, Ex. L. 1933; re-en. Sec. 349.17, R.C.M. 1935; amd. Sec. 79, Ch. 147, L. 1963; amd. Sec. 134, Ch. 253, L. 1974; R.C.M. 1947, 89-120(2).

85-1-333a. Repealed. Sec. 52, Ch. 505, L. 1981.

History: En. Sec. 2, Ch. 169, L. 1935; re-en. Sec. 349.64, R.C.M. 1935; amd. Sec. 80, Ch. 147, L. 1963; amd. Sec. 154, Ch. 253, L. 1974; R.C.M. 1947, 89-402(part).

85-1-334a. Repealed. Sec. 52, Ch. 505, L. 1981.

History: En. Sec. 1, Ch. 148, L. 1951; amd. Sec. 78, Ch. 147, L. 1963; amd. Sec. 130, Ch. 253, L. 1974; R.C.M. 1947, 89-116.1.

90-4-101a. Purpose. The purposes of this part are to stimulate research, development, demonstration, and commercialization of energy sources which are harmonious with ecological stability by virtue of being renewable, thereby to lessen that reliance on nonrenewable energy sources which conflicts with the goal of long-range ecological stability and to provide for the funding and administration of such research. Furthermore it is the purpose of this part to allow the department to make loans through financial institutions in Montana for commercialization of alternative renewable energy.

History: En. 84-7407 by Sec. 1, Ch. 501, L. 1975; R.C.M. 1947, 84-7407; amd. Sec. 1, Ch. 624, L. 1979; amd. Sec. 1, Ch. 356, L. 1981.

90-4-103a. Alternative energy research development and demonstration account established. There is within the earmarked revenue fund an alternative energy research development and demonstration account. Moneys are paid into this account under 15-35-108. The state treasurer shall draw warrants payable from this account upon order of the department.

History: En. 84-7409 by Sec. 3, Ch. 501, L. 1975;  
R.C.M. 1947, 84-7409.

90-4-106. Criteria for grant or loan awards. The department may award grants or loans to applicants under 90-4-105 in accordance with the following criteria:

(1) A grant may cover a period not exceeding 1 year, and the department may not commit itself to spending funds anticipated to be available more than 1 year after the grant period begins. The department may give an applicant a statement of intent to renew its support of his work, subject to the availability of funds and such other conditions as the department may express.

(2) The department may give preference to projects which are also supported by funding from the federal government or other persons provided the projects are consistent with the other objectives of the department. The purpose of this preference is to use the alternative energy research development and demonstration account for matching moneys in order to support more substantial research or commercialization.

(3) The department may give preference to research centers unattached to existing educational institutions where several investigators can share supporting services. However, this shall not be interpreted to prohibit the department from awarding grants or loans to existing educational institutions.

(4) The department may give preference to research centers which make information available to individuals, small businesses, and small communities seeking the use of renewable energy sources in their homes, plants, places of business, and small communities.

(5) All information resulting from such research shall be made available to the public and shall not become the private property of or under the exclusive control of any one company or person.

(6) The department may expend or commit available alternative energy research, development, and demonstration funds. The department may commit funds for demonstration purposes only when in its judgment such expenditures or commitments have good potential for producing savings of nonrenewable energy sources. The department may not commit funds for demonstration purposes when any of the following conditions are present:

(a) previous commitments of a similar nature were not productive;

(b) a similar demonstration has been conducted within close geographic proximity of the geographic location of the proposed demonstration project;

(c) the proposed demonstration project would not further the purpose of this part.

History: En. 84-7412 by Sec. 7, Ch. 501, L. 1975;  
R.C.M. 1947, 84-7412; amd. Sec. 4, Ch. 356, L. 1981; amd.  
Sec. 1, Ch. 402, L. 1981.

90-4-107. Biennial report. The department shall monitor the grants awarded and shall report its expenditures and other information concerning the implementation and effectiveness of specific projects or programs for which

grants were awarded under this part to the legislature at the beginning of each regular legislative session.

History: En. 84-7413 by Sec. 8, Ch. 501, L. 1975; R.C.M. 1935, 84-7413; amd. Sec. 2, Ch. 402, L. 1981.

90-4-103. Oversight function of environmental quality council. The department shall submit periodic reports to the environmental quality council established in 5-16-101 for review and evaluation. The environmental quality council shall make such recommendations as it considers necessary to assure the greatest possible benefit of the program to the people of the state as a whole. Such recommendations may include proposals for legislation.

History: En. Sec. 3, Ch. 402, L. 1981.

15-38-202. Investment of resource indemnity trust account -- expenditure -- minimum balance. (1) All moneys paid into the resource indemnity trust account shall be invested at the discretion of the board of investments. All the net earnings accruing to the resource indemnity trust account shall annually be added thereto until it has reached the sum of \$10 million. Thereafter, only the net earnings may be appropriated and expended until the account reaches \$100 million. Thereafter, all net earnings and all receipts shall be appropriated by the legislature and expended, provided that the balance in the account may never be less than \$100 million.

(2) Beginning in fiscal year 1982, provided the amount in the resource trust account is greater than \$10 million, 30% of the interest income of the resource indemnity trust account must be allocated to the water development earmarked account created by 85-1-604.

History: En. 84-7009 by Sec. 9, Ch. 497, L. 1973; R.C.M. 1947, 84-7009; amd. Sec. 44, Ch. 505, L. 1981.

15-38-203. Purpose of fund usage. Any funds made available under this chapter shall be used and expended to improve the total environment and rectify damage thereto.

History: En. 84-7010 by Sec. 10, Ch. 497, L. 1973; R.C.M. 1947, 84-7010.

15-20-215. Filing fee -- accountability -- refund -- uses. (1) (a) A filing fee shall be deposited in the earmarked revenue fund for the use of the department in administering this chapter. The applicant shall pay to the department a filing fee as provided in this section based upon the department's estimated costs of processing the application under this chapter, but which shall not exceed the following scale based upon the estimated cost of the facility:

- (i) 2% of any estimated cost up to \$1 million; plus
- (ii) 1% of any estimated cost over \$1 million and up to \$20 million; plus
- (iii) 0.5% of any estimated cost over \$20 million and up to \$100 million; plus
- (iv) 0.25% of any amount of estimated cost over \$100

million and up to \$300 million; plus

(v) .125% of any amount of estimated cost over \$300 million.

(b) The department may allow in its discretion a credit against the fee payable under this section for the development of information or providing of services required hereunder or required for preparation of an environmental impact statement under the Montana or national environmental policy acts. The applicant may submit the information to the department together with an accounting of the expenses incurred in preparing the information. The department shall evaluate the applicability, validity, and usefulness of the data and determine the amount which may be credited against the filing fee payable under this section. Upon 30 days' notice to the applicant, this credit may at any time be reduced if the department determines that it is necessary to carry out its responsibilities under this chapter.

(2) (a) The department may contract with an applicant for the development of information, provision of services and payment of fees required under this chapter. The contract may continue an agreement entered into pursuant to 75-20-106. Payments made to the department under such a contract shall be credited against the fee payable hereunder. Notwithstanding the provisions of this section, the revenue derived from the filing fee must be sufficient to enable the department, the department of health, the board, the board of health, and the agencies listed in 75-20-216(5) to carry out their responsibilities under this chapter. The department may amend a contract to require additional payments for necessary expenses up to the limits set forth in subsection (1)(a) above upon 30 days' notice to the applicant. The department and applicant may enter into a contract which exceeds the scale provided in subsection (1)(a).

(b) If a contract is not entered into, the applicant shall pay the filing fee in installments in accordance with a schedule of installments developed by the department, provided that no one installment may exceed 20% of the total filing fee provided for in subsection (1).

(3) The estimated cost of upgrading an existing transmission substation may not be included in the estimated cost of a proposed facility for the purpose of calculating a filing fee.

(4) If an application consists of a combination of two or more facilities, the filing fee shall be based on the total estimated cost of the combined facilities.

(5) The applicant is entitled to an accounting of moneys expended and to a refund with interest at the rate of 6% a year of that portion of the filing fee not expended by the department in carrying out its responsibilities under this chapter. A refund shall be made after all administrative and judicial remedies have been exhausted by all parties to the certification proceedings.

(6) The revenues derived from filing fees shall be used by the department in compiling the information required for rendering a decision on a certificate and for carrying out its and the board's other responsibilities under this chapter.

Ch. 115, L. 1974; amd. Sec. 2, Ch. 268, L. 1974; amd. Sec. 1, Ch. 270, L. 1975; amd. Sec. 6, Ch. 494, L. 1975; amd. Sec. 1, Ch. 179, L. 1977; R.C.M. 1947, 70-806(2)(a), (2)(b); amd. Sec. 7, Ch. 676, L. 1979.

Department of Health and Environmental Sciences  
Environmental Sciences Division

15-2-211. Permits for construction, installation, alterations, or use. (1) The department shall provide for the issuance, suspension, revocation, and renewal of a permit issued under this section.

(2) Not later than 180 days before construction begins of any machine, equipment, device, or facility which the board finds may directly or indirectly cause or contribute to air pollution or which is intended primarily to prevent or control the emission of air pollutants and not later than 120 days before installation, alteration, or use begins, the owner or operator shall file with the department the appropriate permit application on forms available from the department and pay to the department a fee sufficient to cover:

(a) the reasonable costs of reviewing and acting upon the application for such permit; and

(b) the reasonable costs of implementing and enforcing the terms and conditions of such permit if the permit is granted (not including any court costs or other costs associated with any enforcement action). The fee shall be deposited in an earmarked revenue fund to be used by the department for administration of this section.

(3) Nothing in this section shall restrict the board's authority to adopt regulations providing for a single air quality permit system.

(4) The department may, for good cause shown, waive or shorten the time required for filing the appropriate applications.

(5) The department shall require that applications for permits be accompanied by any plans, specifications, and other information it considers necessary.

(6) An application is not considered filed until the applicant has submitted all information and completed all application forms required by subsections (2), (3), and (4). However, if the department fails to notify the applicant in writing within 30 days after the purported filing of an application that the application is incomplete and fails to list the reasons why the application is considered incomplete, the application is considered filed as of the date of the purported filing.

(7) Where an application for a permit requires the compilation of an environmental impact statement under the Montana Environmental Policy Act, the department shall notify the applicant in writing within 180 days of the receipt of a filed application, as defined in subsection (5), of the approval or denial of the application. However, where an application does not require the compilation of an environmental impact statement, the department shall notify the applicant in writing within 60 days of the receipt of a filed application, as defined in subsection (5), of the

approval or denial of the application. Notification of approval or denial may be served personally or by registered or certified mail on the applicant or his agent.

(8) When the department approves or denies the application for a permit under this section, a person who is jointly or severally adversely affected by the department's decision may request, within 15 days after the department renders its decision, upon affidavit setting forth the grounds therefor, a hearing before the board. A hearing shall be held under the provisions of the Montana Administrative Procedure Act.

(9) The department's decision on the application is not final unless 15 days have elapsed and there is no request for a hearing under this section. The filing of a request for a hearing postpones the effective date of the department's decision until the conclusion of the hearing and issuance of a final decision by the board.

History: En. Sec. 8, Ch. 313, L. 1967; amd. Sec. 1, Ch. 185, L. 1975; amd. Sec. 4, Ch. 140, L. 1977; R.C.M. 1947, 69-3911(part); amd. Sec. 4, Ch. 560, L. 1979.

**16-4-1108a--Disposition\_of\_fees\_and\_charges** (1) Fees and charges provided for by this part shall be paid to the department and deposited by it with the state treasurer.

(2) The state treasurer shall place 5% of these fees and charges in the general fund and 95% of these fees and charges in the earmarked revenue fund.

(3) Fees deposited in the earmarked revenue fund may be used to pay claims for expense incurred in the administration of this part when the claims have been approved as provided by law.

History: En. Sec. 6, Ch. 191, L. 1963; amd. Sec. 325, Ch. 350, L. 1974; R.C.M. 1947, 67-2106(part).

**16-4-1212a--Disposition\_of\_fees** The application fee shall be paid into the earmarked revenue fund to the credit of the board and is hereby appropriated for the purposes of carrying out the provisions of this part, subject to 37-1-101(6).

History: En. Sec. 2, Ch. 97, L. 1969; amd. Sec. 334, Ch. 350, L. 1974; R.C.M. 1947, 67-2118(part).

**15-10-105a--Powers\_of\_department** The department may:

(1) accept loans and grants from the federal government and other sources to carry out the provisions of this part;

(2) make loans to a local government for the planning, design, and implementation of a solid waste management system; and

(3) make grants for a local government for planning or implementation of a solid waste management system.

History: En. 69-4014 by Sec. 4, Ch. 575, L. 1977; R.C.M. 1947, 69-4014(2); amd. Sec. 2, Ch. 482, L. 1981.

**15-10-121a--Solid\_waste\_management\_loans--requisites**

(1) The department may, in the name of the state of Montana,

enter into agreements with a local government for loans, subject to any existing contractual obligations of the local government.

(2) A loan agreement must include but not be limited to the following:

(a) the amount of the loan, not to exceed the estimated reasonable amount of the total implementation cost, excluding equipment, construction, or land acquisition as determined by the department;

(b) an agreement by the department to pay part of the amount of the loan to the local government on a timetable as may be agreed upon by the parties;

(c) an agreement by the local government to proceed with the solid waste management system in accordance with plans approved by the department;

(d) an agreement by the local government to commence operation of the solid waste management system on its completion and not to discontinue operations or dispose of the solid waste management system without the approval of the department;

(e) an agreement by the local government to operate and maintain a solid waste management system in accordance with applicable provisions of part 2 of this chapter and rules of the department;

(f) an agreement by the local government to pledge any available sources of revenue to the repayment of loans according to the schedule established by the department. Any revenues from the sale of energy or recycled materials recovered from the solid waste management system and any money received under federal grants for local solid waste management may be used to make such payments. State loan funds for local solid waste management systems may be used only for front-end organizational activities.

(g) an agreement by the local government to establish and maintain adequate financial records for the solid waste management system, including an annual audit of the financial records and transactions covering each fiscal year by a certified public accountant. A copy of each audit must be submitted to the department of administration and the department within 30 days after its completion. Failure of a local government to file a copy of the audit as required by this section shall be grounds for rescinding the loan agreement.

(3) The department may enter into further agreements with a local government and acquire further guarantees or securities as are necessary to implement the provisions of this part.

History: En. 69-4018 by Sec. 8, Ch. 575, L. 1977; P.C.M. 1947, 69-4018(1), (3); amd. Sec. 10, Ch. 68, L. 1979.

15-10-122. Considerations in setting loan priorities.  
In allocating loan funds to local governments, the department shall establish priority based on a consideration of the plan that:

(1) most fully utilizes private enterprise for planning, design, management, construction, and operation of the facilities required to implement a solid waste management system;

(2) includes the largest population;

- (3) is the most financially viable; and
- (4) addresses the most pressing environmental and public health concerns.

History: En. 69-4018 by Sec. 8, Ch. 575, L. 1977; R.C.M. 1947, 69-4018(2).

75-10-532. Disposition of moneys collected. All moneys received from the sale of the junk vehicles or from recycling of the material and all motor vehicle wrecking facility license fees and fees collected as motor vehicle disposal fees shall be deposited with the state treasurer to be utilized for the control, collection, recycling, and disposal of junk vehicles and component parts.

History: Ap. p. Sec. 6, Ch. 410, L. 1973; amd. Sec. 1, Ch. 520, L. 1975; amd. Sec. 4, Ch. 252, L. 1977; Sec. 69-6806, R.C.M. 1947; Ap. p. Sec. 7, Ch. 410, L. 1973; amd. Sec. 1, Ch. 52, L. 1975; amd. Sec. 2, Ch. 520, L. 1975; amd. Sec. 18, Ch. 140, L. 1977; amd. Sec. 5, Ch. 252, L. 1977; Sec. 69-6807, R.C.M. 1947; R.C.M. 1947, 69-6806(3), 69-6807(1).

75-10-104. Duties of department. The department shall:

- (1) prepare a state solid waste management and resource recovery plan for submission to the board;
- (2) prepare rules necessary for the implementation of this part for submission to the board, including but not limited to rules governing the submission of plans for a solid waste management system, rules governing procedures to be followed in applying for and making loans, and rules governing agreements between a local government and the department for grants or loans under this part;
- (3) provide financial assistance to local governments for front-end planning activities for a proposed solid waste management system which is compatible with the state plan whenever such financial assistance is available;
- (4) provide technical assistance to persons within the state for planning, designing, constructing, financing, and operating a solid waste management system in order to insure that the system conforms to the state plan;
- (5) provide front-end organizational loans for the implementation of an approved solid waste management system whenever funds for such loans are available;
- (6) enforce and administer the provisions of this part;
- (7) administer loans made by the state under the provisions of this part; and
- (8) approve plans for a proposed solid waste management system submitted by a local government.

History: En. 69-4014 by Sec. 4, Ch. 575, L. 1977; R.C.M. 1947, 69-4014(1).
